

Giving Back

A key part of MOKA's mission is to support opportunities for people we serve to contribute to their community. Our ability to participate in and safely give back to community has been altered by the pandemic. An initiative driven by the Kent County Health Department allowed 25 individuals served to volunteer and give back to our community in a safe manner.

Individuals served in MOKA's Residential and Community Supports programs completed **2,445** "COVID-19 Kits" for people in need in Kent County. The kits included a cloth mask, digital thermometer, soap, and hand sanitizer. Those who participated were grateful for this opportunity. One

volunteer said, "I wish I could do this all year round because it is fun helping others".

Thank you to the Kent County Health Department for sharing a safe opportunity for MOKA to give back to our local communities.
